Glenn Environmental Health & Safety Help Line

The Glenn Research Center (GRC) Environmental, Health, and Safety (EH&S) Help Line is a special channel of communication for NASA Glenn civil servant and contractor employees, and the various EH&S Offices to use for reporting any safety, health, or environmental concern, or to address any EH&S-related questions.

Why was it formed?

The EH&S Help Line was formed to complement ongoing activities of environmental and safety. It provides a special centralized telephone number to call for reporting environmental, health, or safety concerns. It is also intended to be an easy and uniform way for Glenn personnel to get timely and correct answers or corrective action to their EH&S questions or concerns.

What should be reported on the EH&S Help Line?

Any environmental, health, or safety concern at GRC or the Plum Brook Station that may become or is potentially hazardous to personnel, facilities, hardware, equipment, or the environment should be reported. You may also call the Help Line with any EH&S questions you may have. All emergencies and/or chemical spills should be called into 911, including medical emergencies.

Who can use the Help Line?

Any NASA civil servant or contractor employee is encouraged to use the EH&S Help Line.

How do I file a report?

Call the EH&S Help Line phone number: 433-8848. It is available 24-hours a day, 7-days a week.

You may also access the on-line Help Line Website at http://osat.grc.nasa.gov/osat_hot.html. The direct link to the on-line Help Line Request Form (GRC only) is http://osat.grc.nasa.gov/lerc/helpline_req.html

Glenn Safety Awards Program

General

The Glenn Safety Awards Program was developed to recognize individuals and organizations for their efforts in making the Center a safe workplace for employees to achieve the goals of the Agency. This policy outlines the criteria to be used for the selection of the outstanding employee and organization.

Scope

This program covers all civil service employees and support service contractor organizations at Glenn Research Center and the Plum Brook Station. Employees assigned to safety, environmental, security, and mission assurance and their support contractors cannot participate in this program. The on-line nomination award forms can be found at - <http://osat.grc.nasa.gov/SafetyAward/safety-awards-prog.htm>
